

1) Start by dragging the red icon onto the 'Applications' folder

2) You will have been asked if you wish to replace the existing AAG or create a new one so please say yes.

3) To check which ones you have, click on the top right hand corner magnifying glass and type in AAG. A list of all the versions will come up. Select the red one and double click on it to open it.

4) When it is open you will see the red icon appear in the dock down below.

5) In order to keep it there permanently (whether open or not), right hand click on the dock icon and select 'Options'/'Keep in dock'.
